

# A LAN manager's dream is now a reality.

Intel's EtherExpress PRO adapters—specifically designed for i486 and Pentium PCs.

These hot new EtherExpress PRO adapters were designed with the network manager in mind. Intel has leveraged its silicon expertise and understanding of PC design to produce the most advanced Ethernet adapter. Intel's EtherExpress PRO adapters provide the easiest installation as well as superior performance.

You also get a choice of management: Intel LANdesk, Express remote node management, DMI support, SNMP using standard MIB II and host resources, and MIB management. EtherExpress PRO adapter with Flash adds features you don't normally get with a LAN adapter: On-board PC configuration history for easy diagnostics, virus protection, centralized driver update, and remote boot software. A great value at \$ 89.95 each!

*Intel experience and quality make this breakthrough Ethernet adapter a Must Have!*

## Features/Benefits

- Concurrent processing uses early interrupt technology, increasing throughput.
- 32K buffer memory reduces overhead burden on LANs with high network and/or multitasking operating systems.
- On-board PC configuration history.
- Flash memory stores the last five hardware inventory and software configuration changes.
- Remote boot software for NetWare, LAN Manager, PC LAN and LAN Server making separate boot ROM unnecessary.
- Centralized driver update systematically downloads new drivers from a NetWare server to any node on the network.
