The next generation in remote LAN access.

PHOTO HERE

Introducing LANexpress 2000—the new, easy-to-use, high-performance remote LAN access solution from Microcom, with the easiest setup of any remote LAN access product. You get tangible results just minutes after you open the box. It's easy to use, too—you can access e-mail or use any network services with one quick user-customizable click. What's more, LANexpress can be used for either dial-in or dial-out requirements.

LANexpress uses the latest technology to eliminate remote access bottlenecks and achieve the highest possible throughput by using fast server architecture, high-speed modems with MNP 10, and enhanced serial and parallel port software drivers.

The modems and LAN interface are integrated into one unit, eliminating the usual delays from protocol conversion and serial port multiplexing necessitated by external modems. This makes the LANexpress server significantly faster than other remote LAN access products. LANexpress has both remote control and remote node capabilities, allowing users to increase productivity by choosing the best remote access method for each of their applications.

Premium Remote Client Software provides an easy-to-use interface for non-technical users.

Microcom's LANexpress is a highly flexible method for connecting remote PC users to the corporate LAN.

DIAL-OUT OPERATIONS

- Supports all major communication packages which operate with Windows PCs or which use DOS NCSI/NASI or INT 14
- Supports dial-out modem pooling

DIAL-IN OPERATIONS

- Optimized for IPX, TCP/IP, netBEUI
- Supports native ODI and NDIS driver interfaces
- Windows support for NetWare VLM and NETX

NETWORK MANAGEMENT

- SNMP support including MIB II, TCP/IP, IPX
- IP addressing either per-port or per-user
- Both in-band and out-of-band management

SERVER CONFIGURATION

- 4 to 12 ports
- 2 port modem cards accommodate expansion
- Integrated V.32bis/V.42bis modems (57.6Kbps)
- Bus-attached modems for high multiport speeds
- Supports both thick and thin Ethernet

COMPATIBILITY

- Novell NetWare
- TCP/IP
- Microsoft LAN Manager
- Windows for Workgroups
- IBM LAN Network Manager

Features/Benefits

- Both dial-in and dial-out capabilities for easy network access from anywhere.
- Up to 12 simultaneous users at 57.6 Kbps.
- Remote node and remote control for remote users.
- High speed modem access for high performance.
- Plug and play compatibility with Novell NetWare, TCP/IP, NetBEUI.
- Easy icon operation.
- Broad LAN OS compatibility.
- Remotely upgradeable.

MICROCOM REMOTE LAN ACCESS

DESCRIPTION	ORDER NO.	PRICE EACH
LAN EXPRESS 4 PORT REMOTE ACCESS SERVER	NE	SXX.XX
LAN EXPRESS 8 PORT REMOTE ACCESS SERVER	NE	XX.XX
20 USER REMOTE NODE CLIENT	NE	XX.XX
20 USER FULL CLIENT	NE	XX.XX
DUAL 14.4 MODEM CARDS	NE	XX.XX
SERVICE OPTION: SYSTEM CARE	NE	XX.XX
SERVICE OPTION: SOFTWARE ASSURANCE	NE	XX.XX
