A Cut Above – New from COAST

COAST's new Rapid Response® knife is the must-see product at this year's SHOT Show. Grab one and you may think it is the best knife ever built. For those who really know knives, the fact that it's designed by world-renowned custom knife maker Ron Lake will be enough to make them want to take a look.

Only available from COAST,

the patented SAT™ (Smooth Assist Technology™)

system, makes the Rapid Response the most effortless, fastest opening blade-assist knife ever – with a roller-cam mounted into the blade that the

assisting spring rides on. Just give the

thumb stud a nudge and the blade swings into action instantly.

The Rapid Response is also the safest knife you can

own, with patented Max-Lock™ and double-locking technology.

You can double lock the blade when it's open, and completely lock it when it's closed.

This knife has it all – super strong handles, open frame design for easy cleaning, heat-treated, stainless-steel liners, ambidextrous thumb stud, and reversible pocket clip. And it's only one of a completely new line of COAST knives to be unveiled at the show.

See What You've Been Missing.

In 2011, COAST released a totally new line of LED flashlights with patented, proprietary and unique advances like Pure Beam™ Focusing, Bulls-Eye Spot Beam and Fingertip Speed Focus Control™. They run on standard alkaline batteries, offering brightness, range and beam clarity that you have to see to believe.

The new **HP7** delivers 251 lumens of light in a rugged 5.5-inch aluminum case. And for the SHOT show, COAST introduces the amazing **HP21** that projects over 1,300 lumens up to 850 feet!

See these new COAST products and more at the SHOT show, **Booth 15120**, or contact us for more info. www.coastportland.com
